## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, 11, 13-14, 17-18, 20, 22-24, 26, 28-30, 32, 34-37, 41, and 47 are drawn to a laser for generating light pulses at a selected operating wavelength or range of wavelengths and a selected fundamental repetition frequency comprising:, classified in class 372, subclass 30.
- II. Claims 38 and 40 are drawn to a waveguide which comprises a layer, film or coating comprising carbon nanotubes through which light passes, classified in class 333, subclass 329.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the waveguide in the invention II is not necessary required in a laser device in the invention I. The subcombination has separate utility such as a fiber system.
